

Project Status Update: JigyaSci

This document provides a comprehensive update on the current development status of the JigyaSci project. We are pleased to report significant progress across all major functional modules.

The overall project is approximately **70% complete**, with all core foundational systems now in place and functioning.

Below is a detailed breakdown of the completed modules and their current status:

1. Homepage & Navigation System

- Status: **100% Complete**
- Details: The homepage has been fully developed and is live. It includes an advanced, tab-based search functionality, providing an intuitive and powerful interface for users to find content.

2. User Authentication & Management System

- Status: **100% Complete**
- Details: The login and registration system is fully operational. It successfully differentiates between and handles multiple user types as specified in the project requirements.

3. Centralized Admin Dashboard

- Status: **100% Complete**
- Details: A comprehensive admin dashboard has been implemented. It is fully functional and allows for the efficient reading, management, and analysis of all user data.

4. User-Specific Opportunity Functions

- Status: **100% Complete**

Project Status Update: **JigyaSci**

- Details: The core functionality for each user type has been developed and integrated. The system now correctly presents opportunities and features based on the privileges and role of the logged-in user.

Next Steps & Pending Items:

The completed modules form the solid backbone of the application. Our development team will now focus on the remaining tasks, which include:

- Final integration and end-to-end testing.
- UI/UX polish and refinement.
- Performance optimization and security hardening.
- User Acceptance Testing (UAT) and bug fixes.

We are on track to meet the projected timeline. We will schedule a demonstration call next week to walk you through the current build and gather your valuable feedback.
